Enclosed:
A picture of the future in keyboard training.

SMITH CORONA™

S-II

the motivator

Keyboard Skills...
...the key to success in the keyboard age.

A special electronic typewriter for classroom keyboard instruction. Right now there are more than 800,000 typewriters in schools in the United States; probably half of them ready for replacement.

This is it. A rugged, dependable, tamper-proof electronic that's student friendly ... with just enough sophistication to give them solid, real-life experience.

S-II

SMITH CORONA
JERRY L. DIENER
VICE PRESIDENT — SALES

To: All Smith Corona Executive Line Dealers

The Smith Corona S-II is a Teaching Machine . . .

It is accepted among educators that motivation and discovery are the keys to learning. The S-II is designed to encourage students to discover and learn an essential skill - keyboard proficiency.

Today's electronic devices for computing, word processing, and communications all require keyboard skills. No matter what the configurations of future products, keyboard accuracy and speed will remain essential to their operation.

Students with cost-effective keyboard skills have a decided edge in an increasingly competitive marketplace.

The Smith Corona S-II

Is Designed to Teach

Marketable Keyboard Skills.

It needs no software - no peripherals - no printer or monitor - or any of the other components which the student may someday face. The S-II provides a real life experience with a product that is both simple and sophisticated. And dependable. It is manufactured by Smith Corona in our Cortland, New York plant.

To Assist You in Reaching Your School Sales Potential

We are sending the enclosed mailing piece to buying influences in all of our country's school and colleges. Responses will be forwarded to you through your Smith Corona area manager. To make a mailing of this same item to the school boards and administrators in your own marketing area, just ask us for suitable quantities. We will send them to you at no charge.

Please send the reply card back to me, or contact your Smith Corona area manager.

Good selling!

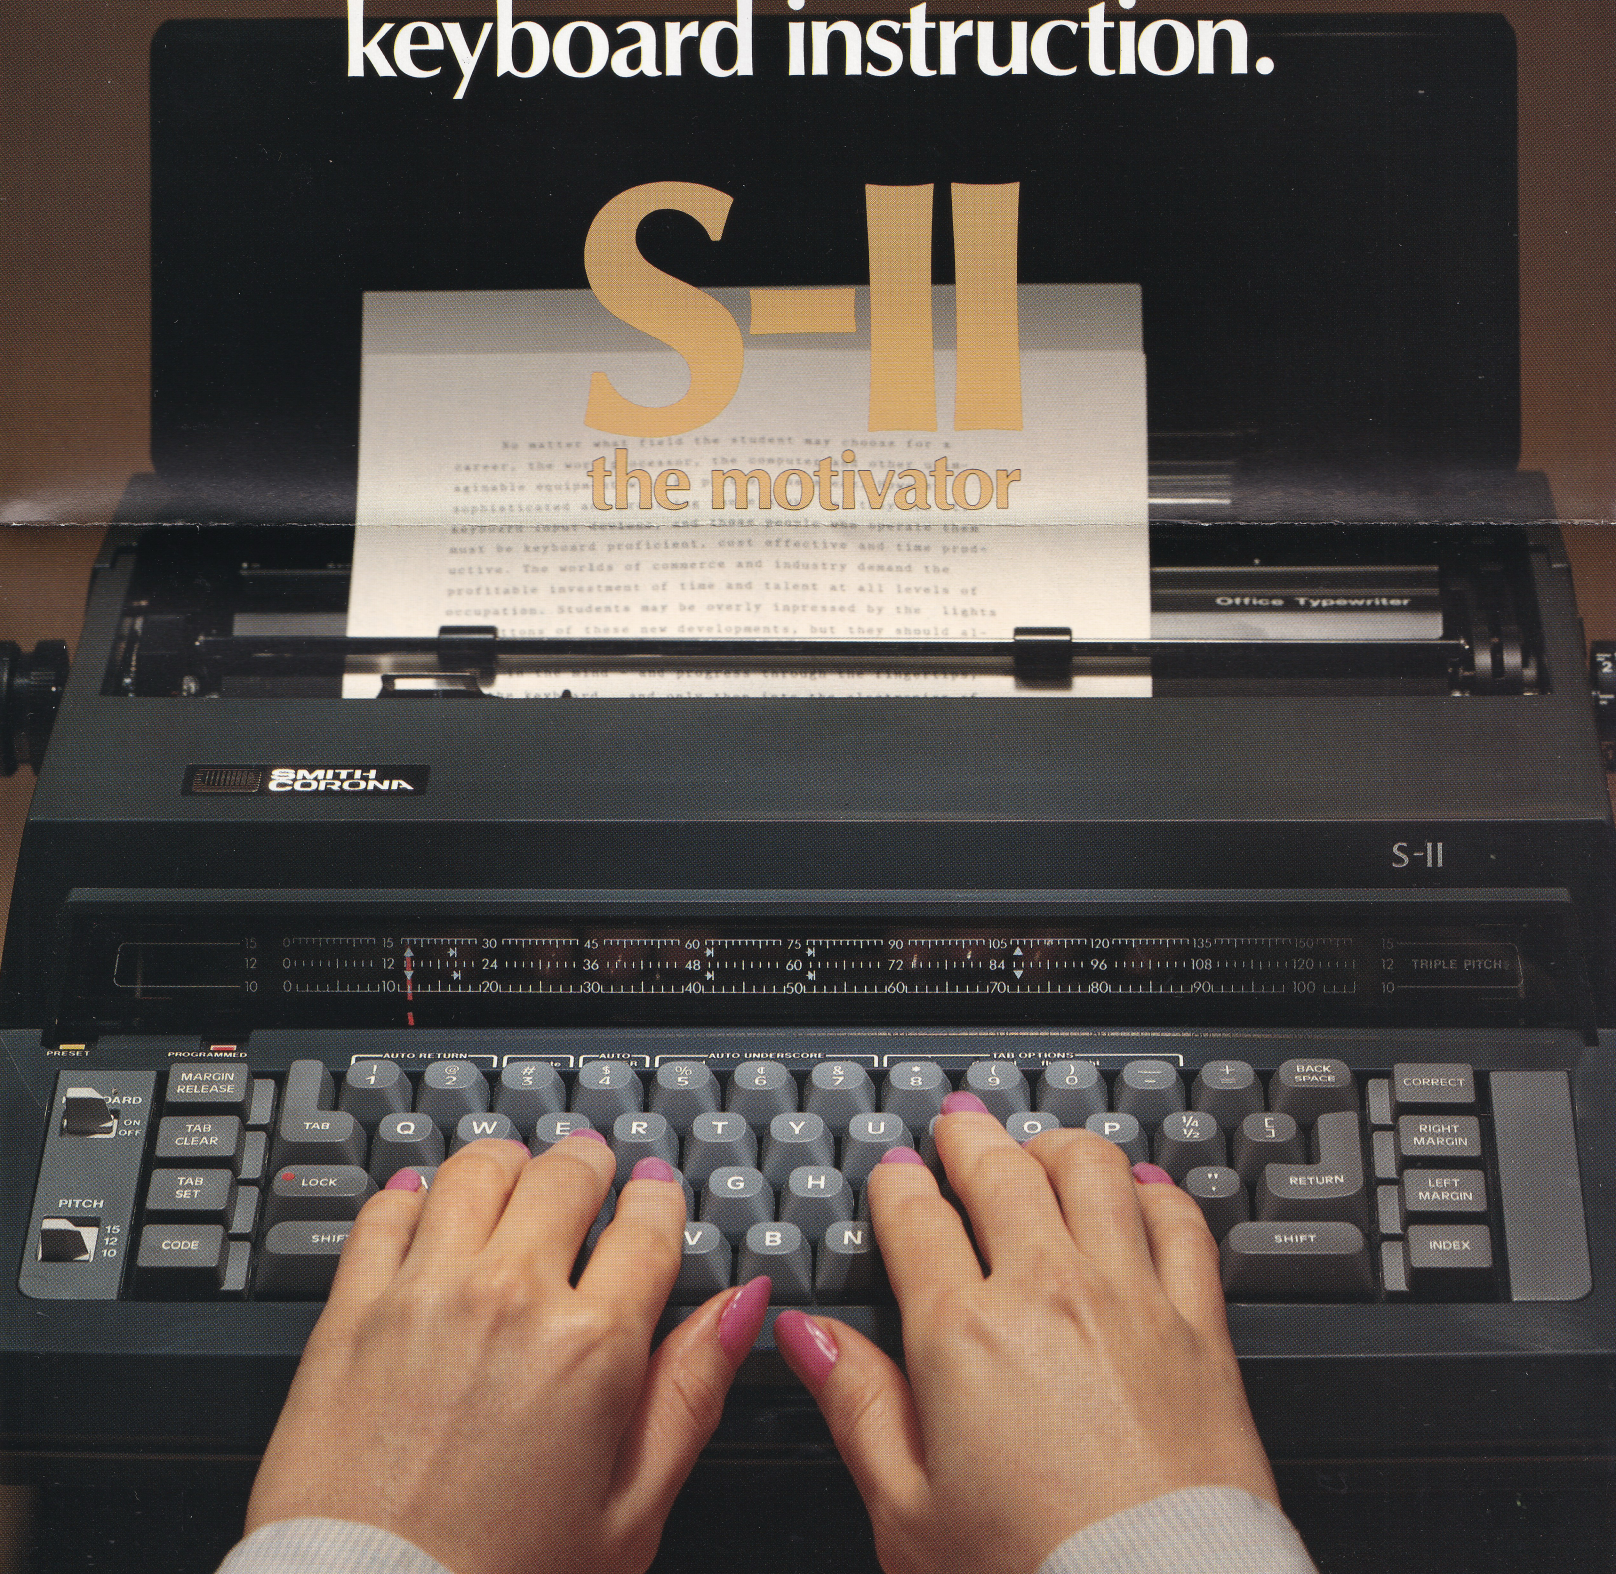
Jerry L. Diener
Vice President - Sales

SMITH CORONA™

office typewriter for classroom keyboard instruction.

S-II

the motivator



SMITH CORONA™

S-II the motivator

Never before has the need for effective keyboard training been greater. Whether your students move on to word processors, computers or the unimaginable electronic devices of the future, keyboard proficiency remains vital to their success in the job market. Speed and accuracy are the saleable factors.

The S-II will not overwhelm your students with programs and peripherals. It simply helps you teach marketable keyboard skills, and at the same time, provides instruction in time saving electronic functions. The essential skill is still keyboarding, cost effective, proficient and accurate.

The S-II will let your students learn such things as changeable type sizes, styles and spacing; full line error correction with high speed, automatic relocate. It demonstrates such functions as automatic carrier return, automatic centering and automatic underscore. With the S-II they can learn to tabulate on decimals, tab on centers and tab flush right.

The S-II is quiet, virtually trouble free, and tamper proof. It meets the special needs of the classroom.

The S-II looks, sounds and feels like a high priced office typewriter, yet it is priced far below most of today's electronic office typewriters. It is designed for one purpose - to help you teach keyboard proficiency.

Drop-in ribbon cassettes — Lift-Rite, carbon film, multi-strike, nylon and four colors.

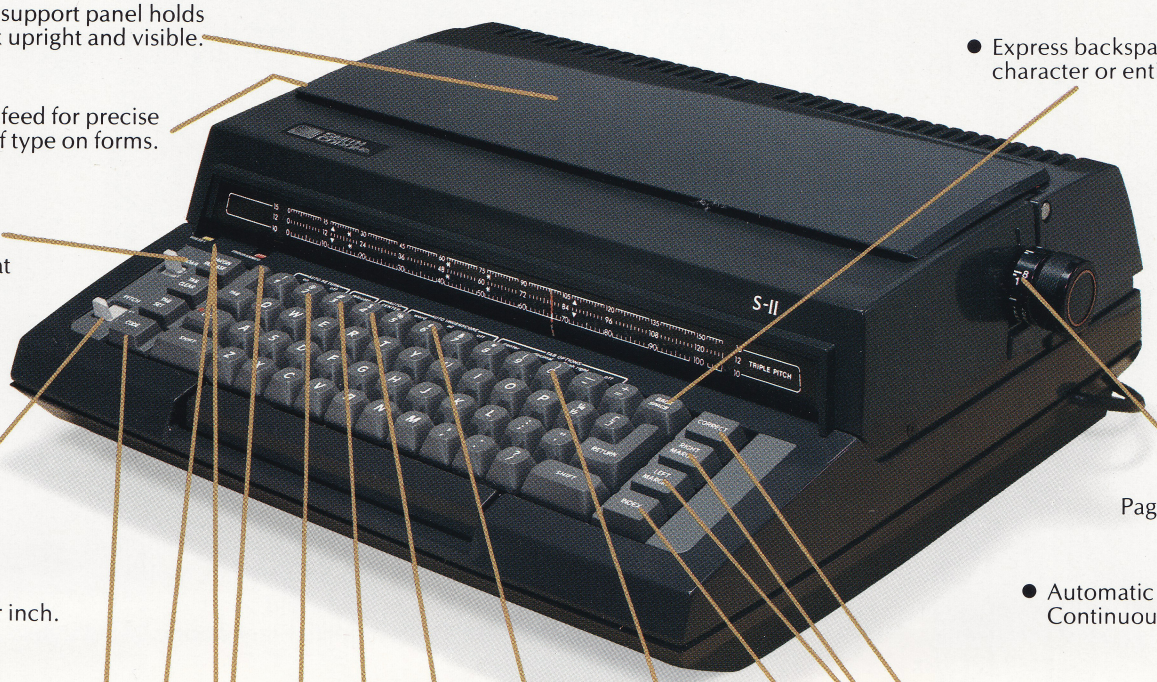
Impression control for greater or less type impact.

Interchangeable printwheels snap in — deliver professional quality print. Low cost and durable.

Paper support panel holds your work upright and visible.

Infinite line feed for precise positioning of type on forms.

Leave keyboard switch on to hold letter format and tab stops in memory.



- Express backspace for one character or entire line.

Page end indicator.

- Automatic paper insert. Continuous feed; also ejects.

- Multiple pitch at a touch — 10, 12 and 15 characters per inch.

Code key activates automatic functions.

Preset letter format — indent, center, signature, margins.

Indicator lights show preset or programmed modes.

Auto-carrier return for neat margins and non-stop typing.

- Memory correction removes up to full line, 157 characters with one touch of one key.

Touchset electronic margins . . . instantly.

- Index key advances paper vertically — one line or repeat action.

Memory speed cushion prevents overstrikes, dashes and voids.

Office-sized keyboard — 45 large, comfortable keys.

Repeating keys for dots, dashes, underlines and XXXxxx's.

- Up to 16 programmable tab stops, plus rapid reverse tabulation.

Auto relocate to next typing position after fixing errors within line.

Automatic tab center, decimal tab and flush right.

Auto underscore words or lines — automatically as you type.

- Auto centering — positions headlines precisely between margins.

Computer compatible, dealer upgradeable – works with most home computers, and wordprocessors. Requires Messenger Module and proper connecting cable. Messenger Module plugs into the typewriter and has dual interface plugs to deliver high quality bi-directional printing at 144 wpm. Skips white space for increased throughput.
